Friday 1st April at 7.30 pm prompt

“This Land” by Sian Owen

Two actors tell twenty character’s stories about what’s happening 10,000 ft. under the land beneath their feet. An exhilarating array of encounters from the absurd to the profound make this a playful, unique theatrical experience.

This Land looks at how rural areas are being affected by climate change – and the solutions that are being trialled to reverse its effects. Is fracking the answer? For this production village halls are transformed into a dig site, as the audience experience a theatrical rollercoaster hundreds of miles under the earth.

Tickets:- Adults £7 Children £4
